

Course Outline

Course Code: PPL4O
Course Title: Healthy Active Living Education, Grade 12, Open
Department: Health and Physical Education
Course Type: Open
Credit Value: 1
Grade: 12
Prerequisite(s): None

School Name: Grey Highlands Secondary School
Teacher: R. Teeter

Ministry Curriculum Policy Document

The Ontario Curriculum, Grades 11 & 12: Health and Physical Education, 2015

Course Description/Rationale

This course focuses on the development of a personalized approach to healthy active living through participation in a variety of sports and recreational activities that have the potential to engage students' interest throughout their lives. Students will develop and implement personal physical fitness plans. In addition, they will be given opportunities to refine their decision-making, conflict-resolution, and interpersonal skills, with a view to enhancing their mental health and their relationships with others.

Assessment / Evaluation

Seventy per cent (70%) of the grade will be based on evaluation conducted throughout the course. This portion of the grade should reflect the student's most consistent level of achievement throughout the course, although special consideration should be given to more recent evidence of achievement.

Thirty per cent (30%) of the grade will be based on a final evaluation administered at or towards the end of the course. This evaluation will be based on evidence from one or a combination of the following: an examination, a performance, an essay, and/or another method of evaluation suitable to the course content. The final evaluation allows the student an opportunity to demonstrate comprehensive achievement of the overall expectations for the course.

Teachers will ensure that student learning is assessed and evaluated in a balanced manner with respect to the four categories, and that achievement of particular expectations is considered within the appropriate categories. The emphasis on "balance" reflects the fact that all categories of the achievement chart are important and need to be a part of the process of instruction, learning, assessment, and evaluation in all subjects and courses. However, it also indicates that for different subjects and courses, the relative importance of each of the categories may vary. The importance accorded to each of the four categories in assessment and evaluation should reflect the emphasis accorded to them in the curriculum expectations for the subject or course, and in instructional practice.

- Knowledge and Understanding
- Thinking
- Communication
- Application
